Aerospace engineering is the primary field of engineering concerned with the development of aircraft and spacecraft. It has two major and overlapping branches: aeronautical engineering and astronautical engineering.

### **Aerospace engineering - Wikipedia**

All engineering students learn the latest methodologies and study beyond the fundamentals. Our students are challenged to design solutions, incorporating everything from brainstorming ideas, refining design, building, and troubleshooting to final testing and presenting a project.

The Faculty of Engineering, Built Environment and Information Technology at the University of Pretoria is a leading and dynamic faculty that is one of the foremost providers of high-level intellectual capital and research in the country.

### **Mechanical & Aeronautical Engineering | University of Pretoria**

This course is suitable for applicants with an engineering background who have a particular interest in aircraft technologies. Air travel is vital for the continued prosperity of the economy, and is predicted to grow significantly over the next 20 years. The challenge facing aviation is to meet the

Engineering has existed since ancient times, when humans devised inventions such as the wedge, lever, wheel and pulley. The term engineering is derived from the word engineer, which itself dates back to 1390 when an engine'er (literally, one who builds or operates a siege engine) referred to "a constructor of military engines."

Upon admission to the university, students may directly enroll as pre-engineering students; however, direct enrollment is selective. Factors used to determine eligibility to directly enroll include ACT/SAT scores (emphasis on math), strong college prep curriculum (emphasis on math, science and rigorous courses), and class rank or GPA.
