

### **Biology Life On Earth 6th**

Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate.

### **Life - Wikipedia**

The tree of life or universal tree of life is a metaphor, model and research tool used to explore the evolution of life and describe the relationships between organisms, both living and extinct, as described in a famous passage in Charles Darwin's *On the Origin of Species* (1859).

'Biological annihilation:' Earth's 6th mass extinction is underway. Scientists say we've entered a sixth mass extinction, and humans are the primary cause, according to a new study.

### **Earth faces sixth mass extinction - USA TODAY**

Biology is often approached on the basis of levels that deal with fundamental units of life. At the level of molecular biology, for example, life is regarded as a manifestation of chemical and energy transformations that occur among the many chemical constituents that compose an organism.
