

Computational Geometry Algorithms And Applications

Computational geometry is a branch of computer science devoted to the study of algorithms which can be stated in terms of geometry. Some purely geometrical problems arise out of the study of computational geometric algorithms, and such problems are also considered to be part of computational geometry.

SIAM Presents ... Features Lectures from our Archives Since 2008 SIAM has been capturing many Invited Lectures, Prize Lectures, and selected Minisymposia from our conference.

SIAM: Archives and Future Meetings

Algebraic geometry is a branch of mathematics, classically studying zeros of multivariate polynomials. Modern algebraic geometry is based on the use of abstract algebraic techniques, mainly from commutative algebra, for solving geometrical problems about these sets of zeros.

GPU-accelerated Libraries for Computing NVIDIA GPU-accelerated libraries provide highly-optimized functions that perform 2x-10x faster than CPU-only alternatives. Using drop-in interfaces, you can replace CPU-only libraries such as MKL, IPP and FFTW with GPU-accelerated versions with almost no code changes. The libraries can optimally scale ...

About the Conference. Sponsored by the SIAM Activity Group on Geometric Design (SIAG/GD). SIAM GD 2019 will be held as part of the International Geometry Summit (IGS), with three co-located events: Shape Modeling International (SMI) 2019, Geometric Modeling and Processing (GMP) 2019, and Solid and Physical Modeling (SPM) 2019.

SIAM Conference on Industrial and Applied Geometry (GD19)

Geometry, Surfaces, Curves, Polyhedra. The following is a dictionary of various topics in geometry the author has explored or simply documented over the years.

Geometry, Surfaces, Curves, Polyhedra - Paul Bourke

Using insights from geometry and physical simulation, we can alter the behavior of materials to meet functional goals. For instance, we can cut slits into a solid, inextensible sheet of material to allow it to expand, and then by carefully designing these cuts, we can ensure the sheet pops into the curved surface of our choice when it is stretched.
