Hi, I have a 3-year-old Honda GCV160 model. I've never had a problem with it until this summer. Once I stop the mower, it won't restart. Once it has cooled down sufficiently, it will start right up again. My neighbor thinks it might need to have the gaskets replaced. The air filter is new, and the spark plug is okay. Has anyone had this problem?

Bought this mower from an Amazon seller in April. This mower has been fantastic. I had to adjust the self propelled belt a couple of times due to my cutting some very heavy brush full of sticks , straw and pine combs.
