If your planter already has a press wheel distance sensor it is set up for an Early Riser monitor. The seed sensors have a red IH symbol on the back side if they are for a Seed Flow monitor, and it is just black if they are high rate sensors. I have an 800 with a Cyclomitor III and a 950 with an Early Riser and they both have black high rate sensors. The Early riser harness connector should be ...

The monitor is from a 900 planter, The wiring harness was shot when I bought the planter so had AG Express make me a harness for the early riser monitor. I had everything all hooked up seed in the drums and I pulled it for about 100 feet in the driveway and it still said fail. Maybe I didn't go far enough, I guess I'll get a manual from the dealer.
