Genetic engineering is the transfer of DNA from one organism to another using biotechnology. The
organism receiving the DNA is said to be genetically modified (GM). Organisms are genetically ...

Genetic engineering - Revision 1 - National 5 Biology ...

Genetic engineering, also called genetic modification or genetic manipulation, is the direct
manipulation of an organism's genes using biotechnology. It is a set of technologies used to change
the genetic makeup of cells, including the transfer of genes within and across species boundaries to
produce improved or novel organisms .
