

### **Geothermal Engineering Weather**

Geothermal energy is thermal energy generated and stored in the Earth. Thermal energy is the energy that determines the temperature of matter. The geothermal energy of the Earth's crust originates from the original formation of the planet and from radioactive decay of materials (in currently uncertain but possibly roughly equal proportions).

### **Geothermal energy - Wikipedia**

A geothermal heat pump or ground source heat pump (GSHP) is a central heating and/or cooling system that transfers heat to or from the ground. It uses the earth all the time, without any intermittency, as a heat source (in the winter) or a heat sink (in the summer).

### **Geothermal heat pump - Wikipedia**

2 Why Support Geothermal Energy? Geothermal energy is a clean, renewable resource that provides energy in the U.S. and around the world. Heat flows constantly from the earth's interior and will continue to radiate for billions of years to

About INE. The Institute of Northern Engineering (INE) is the research arm of the College of Engineering and Mines (CEM). It has several distinct research centers and provides facilities and support to dozens of researchers working in conjunction with the College.

### **INE**

In partnership with Cornwall-based EGS Energy, we have planning permission for a 5-7MW geothermal power plant on the Eden Project site, taking energy from the heat in underground granite rocks.

### **Eden Deep Geothermal Energy Project**

Note that the list is based on the two main ways we harness geothermal energy today: Electricity generation with geothermal power plants and geothermal heating and cooling systems.
