

Google Android User Guide

There are 3 main areas to this Android build file: buildscript { ... } configures the code driving the build. In this case, this declares that it uses the jCenter repository, and that there is a classpath dependency on a Maven artifact.

Gradle Plugin User Guide - Android Studio Project Site

Welcome to the Android developer guides. The documents listed in the left navigation teach you how to build Android apps using APIs in the Android framework and other libraries.

Developer Guides | Android Developers

This guide is for publishers who want to monetize an Android app with AdMob and aren't using Firebase. If you plan to include Firebase in your app (or you're considering it), see the AdMob with Firebase version of this guide instead.

Get Started | Android | Google Developers

As of April 10, 2018, Google has deprecated GCM. The GCM server and client APIs are deprecated and will be removed as soon as May 29, 2019. Migrate GCM apps to Firebase Cloud Messaging (FCM), which inherits the reliable and scalable GCM infrastructure, plus many new features.

Migrate a GCM Client App for Android to Firebase Cloud ...
