1. Understand the tasks that the program is to perform. • Learning what the customer wants. 2. Determine the steps that must be taken to perform the task.

Starting Out with Programming Logic & Design Second Edition

Draw a flowchart to represent the logic of a program that allows the user to enter a value that represents the radius of a circle. The program calculates the diameter (by multiplying the radius by 2), and then calculates the circumference (by multiplying the diameter by 3.14). The program prints both the diameter and the circumference.
