An artificial neural network is a network of simple elements called artificial neurons, which receive input, change their internal state (activation) according to that input, and produce output depending on the input and activation.

Artificial neural network - Wikipedia

The identification of emerging topics is of current interest to decision makers in both government and industry. Although many case studies present retrospective analyses of emerging topics, few studies actually nominate emerging topics for consideration by decision makers.

Identifying emerging topics in science and technology ...

In recent years, deep artificial neural networks (including recurrent ones) have won numerous contests in pattern recognition and machine learning.
