Axon for Business Users | Informatica US

Software architecture refers to the fundamental structures of a software system and the discipline of creating such structures and systems. Each structure comprises software elements, relations among them, and properties of both elements and relations. The architecture of a software system is a metaphor, analogous to the architecture of a ...

Software architecture - Wikipedia

A software requirements specification (SRS) is a description of a software system to be developed. It is modeled after business requirements specification, also known as a stakeholder requirements specification (StRS).
